

# The Role Of Education In Poverty Reduction

Tojibayev Bahromjon Turabayevich

Associate Professor, Namangan Institute of Engineering and Technology

## Introduction.

Poverty is global problem is, and its decrease all countries for important is a task. Education, own in turn, poverty of shortening effective means is because it is not only personal level, but society and economic development point from the point of view both big impact shows. UNESCO, World Bank and other international of organizations to research according to education level increase people's work places and income to improve, social equality to provide and from reading use opportunities to expand help. At the same time, education plays an important role in combating poverty through its economic, social and cultural impact. Investing in education has long-term economic benefits for countries, as it reduces unemployment, creates new jobs and increases competitiveness in the labor market. Education also It serves to ensure gender equality, social mobility, and stability in society Poverty reduction for education in development new directions and innovations important to the point have Technologies growth, online education, distance learning to read and digital platforms to education was entrance opportunities by extension, the poor in the regions people for both education to take possible gives of education the importance in lighting as well as in education to achieve and his/her adjective to increase directed state policies and international programs ( for example, UNESCO Stable Development Goals ) attention to turn necessary.

This in the article of education poverty in shortening place, its economic and social influence, as well as innovative of technologies to education was the effect seeing to leave purpose does.

## INTRODUCTION.

### Education economic effect

Education economic effect every one of the state far fixed-term in development important to the point UNESCO and World bank to research according to education received people society economic in growth big contribution they add Knowledgeable personnel of the country work to release ability increases, thus together their income level both increases. International to practices according to education every one additional year work increases wages by 10%. For example, STEM (science, technology, engineering) and mathematics) in the field education to people high salaries and work places creation possible gives.

From now on besides, education unemployment reduces High qualified to the staff was of need increase labor in the market unemployment level reduces To poverty against struggle for to education investment input economic of success key being, states for social and economic fruits gives .

### Education social effect

Education social equality in providing important is a factor. Of poverty decrease to read and to education was to the molds despite social mobility provides. Poor from the family came out youth education to take through social statuses improvements can Social of mobility increase family of members good life in a way to achieve provides. of UNESCO to the report according to the girls education whole family for social and

economic fruits gives their children both education to take motivated They will be .

Gender equality in providing both of education important There is a place for it. Up to education owner was girls in the family and in society own role good know, social in life active participation to do more capable. This is yours. in turn, of poverty to decrease and gender equality to provide take comes. From there come out, education social effect society stable to the development They help.

To education investment input and policies

To education investment introduction — poverty of shortening the most effective from the methods is one International finance institutions, such as the World Bank and UNESCO, in countries to education was investment to expand directed programs work coming out To education investment input from the family to the family, from the person to the person education quality through their life level to increase help gives. World bank to the reports according to education investment input economic 2-3 times of growth high to be take comes.

Remote education and online learning development both to education investment in the introduction to the point owner. Special education programs, for example, microcredits or over the internet qualification increase opportunities, poor in the regions to education entrance opportunities expanded.

Innovative technologies and of education development

Technologies education in the field opportunities further expanded. Remote education, online courses and digital platforms education faster and easier to provide help gives. This technologies poor in the regions people for to education entrance possible

gives, thus together their economic and social situation to improve help gives.

According to UNESCO according to, digital platforms and mobile technologies through supreme to education the rest for opportunities is created. This innovations of education territorial and financial obstacles to overcome help gives.

### Conclusion

Education poverty in reduction plays an important role because it is human economic and social the situation to improve help gives Economical in terms of education unemployment reduce income increase and work in the market competitiveness to provide directed effective tool is, every one additional education year human work increases wages by 10% ( Hanushek & Woessmann, 2020). Social to the extent gender equality in education, social mobility and in society stability in providing important to the point has (UNESCO, 2020). Remote education and digital technologies through to education entrance opportunities expanded poor, in need in the regions people for both education to take opportunity appearance It happened.

Governments and international organizations to education investment input and his/her adjective to increase directed many policies work are coming out. This in the article of education poverty in shortening development and his/her social, economic and innovative effects analysis done To education investment input, innovative of technologies effect and of education stable to development added contribution poverty in shortening effective The methods are.
