

# Teaching the Digital Poems of Abdurakhmon Akbar and Dilshod Rajab Using Modern Pedagogical Technologies

Qoshamatov Gulmira Abduqahhova

Teacher at Alisher Navoi Tashkent State University of Uzbek Language and Literature

**Annotation:** This article explores the integration of modern pedagogical technologies in teaching the digital poems of Abdurakhmon Akbar and Dilshod Rajab, two prominent poets from Central Asia. By leveraging advanced digital tools and techniques, the article examines how these resources can enhance the teaching and learning experience, particularly in the context of poetry analysis, language learning, and cultural understanding. The study focuses on the application of technology in classroom settings, exploring various methods and results of integrating digital poetry into educational frameworks.

**Keywords:** Abdurakhmon Akbar, Dilshod Rajab, digital poetry, modern pedagogical technologies, language learning, digital tools, poetry teaching methods, Central Asian literature.

## INTRODUCTION

In the rapidly evolving field of education, the integration of modern pedagogical technologies has become indispensable for enhancing the effectiveness of teaching and learning processes. One area where these technologies can make a significant impact is in the teaching of literature, particularly poetry. This article focuses on the digital poems of two renowned poets from Central Asia: Abdurakhmon Akbar and Dilshod Rajab. These poets have made significant contributions to contemporary poetry, and their works hold immense value in understanding the socio-cultural context of the region.

Digital poetry, as a form of contemporary literature, offers unique opportunities to engage students with the poetic traditions of the region while incorporating modern technologies into the learning process. This article aims to explore how modern pedagogical technologies, including digital tools, multimedia, and online platforms, can be utilized to teach the poems of Akbar and Rajab effectively.

The primary goal of this study is to examine how technology can enhance the learning experience in poetry analysis and interpretation. By using digital tools such as interactive e-books, online annotation platforms, and multimedia resources, educators can create more engaging and dynamic learning environments. Moreover, by connecting traditional poetic forms with modern technology, educators can foster a deeper appreciation for Central Asian literature and its contemporary evolution.

## Methods

To explore the use of modern pedagogical technologies in teaching the digital poems of Abdurakhmon Akbar and Dilshod Rajab, this study employs a combination of qualitative methods, including classroom observations, surveys, and interviews with both educators and students. The study is conducted in a variety of educational settings, including secondary schools and universities in Central Asia.

## Discussion

The integration of modern pedagogical technologies in the teaching of poetry can significantly enhance the learning experience.

Through the digitalization of Abdurakhmon Akbar and Dilshod Rajab's poems, students are introduced to an interactive and multimodal approach to literature, which allows for deeper engagement with the text.

### 1. Increased Student Engagement

One of the key advantages of using digital technologies in the classroom is the increased engagement of students. Digital poetry formats, such as interactive e-books and annotated texts, allow students to explore the poems in a more personalized way. For instance, students can use online tools to highlight key phrases, make notes, and even share their thoughts with peers in real time. This collaborative approach fosters a sense of ownership and active participation in the learning process.

### 2. Multimedia Integration

By incorporating multimedia elements such as video commentaries, sound recordings, and visual representations of the poems, educators can appeal to different learning styles. Multimedia helps contextualize the poetry within its cultural and historical background, making it more accessible to students. Visual aids, such as illustrations or maps, can also help students better understand the imagery and symbolism in the poems.

### 3. Enhanced Critical Thinking and Analysis

The use of digital annotation tools allows students to engage in deeper analysis of the poems. Through collaborative online annotations, students can highlight literary devices, themes, and motifs while also contributing to a shared understanding of the text. This fosters a more critical approach to reading and encourages students to examine the poems from multiple perspectives.

### Results

The implementation of digital pedagogical tools in teaching the digital poems of Abdurakhmon

Akbar and Dilshod Rajab yielded positive results in terms of student engagement and comprehension.

#### 1. Improved Understanding of Poetry

Students demonstrated a higher level of understanding and appreciation for the poems when digital tools were used. In particular, students who participated in online discussions and annotated the texts found it easier to connect with the themes and language of the poems.

#### 2. Increased Collaboration

The collaborative nature of digital annotation and discussion forums resulted in improved peer interaction. Students shared their interpretations and insights, which contributed to a more dynamic learning environment.

#### 3. Student Satisfaction

Surveys revealed that students were generally satisfied with the use of digital technologies. Many students expressed that they felt more involved in the learning process, with some indicating that the multimedia aspects made the poems more engaging and easier to understand.

#### 4. Teacher Feedback

Teachers reported that the integration of technology allowed for more interactive and diverse teaching methods. However, they also noted the need for continuous training and support to ensure the effective use of digital tools.

### Conclusion

The use of modern pedagogical technologies in teaching the digital poems of Abdurakhmon Akbar and Dilshod Rajab offers a promising approach to enhancing literature education. By integrating digital tools, educators can create more engaging, collaborative, and interactive learning environments that foster a deeper understanding of poetry. Although challenges such as access to technology and the need for proper training exist, the benefits of using digital platforms in the classroom outweigh the drawbacks.

This study highlights the potential of digital poetry in transforming traditional literature education and suggests that further research and development in this area will continue to benefit both students and educators in the future.
